

THE  
TRADITIONAL  
RANGE

photo courtesy of Arthur Sanderson and Sons

A collection of period designs and also some design classics;

## The Traditional Range.

### Hand Carving

In keeping with the earliest originals, many of the designs are hand carved but can also be manufactured using less costly resin embellishments or if preferred, without any decoration.

### Bespoke

Whilst this brochure contains a standard range, any of our designs can be varied in size or finish to suit your requirements. Alternatively, let us have your own design for a complete custom build.

### Overmantel Mirrors

It is also possible to manufacture an overmantel mirror to compliment any mantel design and to the size you require. A few suggestions are illustrated, but please contact us for more information.

By manufacturing each mantel to order using a variety of solid timbers, Classic Mantels offer the widest choice to every customer. Whether you choose from our wide range of standard stain colours, a natural finish, or prefer us to colour match to your existing furniture, each mantel is hand finished to accentuate the natural grain and markings in the timber. Alternatively you may wish to harmonise your interior scheme by choosing our hand painted eggshell finish which we offer on any currently available paint chart or BS reference.

Only the finest quality timbers are used in the manufacture of our mantels which are sold subject to the natural markings and variation in grain pattern forming the character of the timber. Whilst every care is taken in selection, mantels supplied untreated or with a natural finish may be particularly subject to colour variation.

All of our timbers are kiln dried and therefore contact with even the minimum of moisture may lead to movement. Timber mantels should never be installed against a newly plastered wall. Most timbers, especially cherry, will mature in colour over a short period of time. This is a natural occurrence dependent on exposure to natural light.

We are committed to continuous development and improvements to our products and therefore reserve the right to alter specifications without prior notice. The colour and shade reproduction in this brochure is as accurate as the printing process allows and should not be used as an accurate guide.

By prior appointment, visitors are welcome to see our production process, timbers used and the quality of our finished goods.
